- AWS
- PostgreSQL
- MongoDB
- Git and Version Control
- Cross-Browser Testing and Debugging
- Web Hosting
- TDD & BDD
- Heroku
- MySQL
- Node.js
- React Redux

Languages

- HTML and CSS/SASS
- JavaScript & JQuery
- React
- React Native
- SQL & NoSQL
- Angular

Projects

- MyFlix2 - was built using Angular. It's the client side to the existing REST API
- Chat - Is a chat app for mobile devices using React Native. It provides users with a chat interface and options to share images and their location
- Meet - Created a serverless, progressive web app with React using TDD technique. It uses the Google Calendar API to fetch upcoming events
- MyFlix - Is a React single-page, responsive app with routing, rich interactions, several interface views, and polished UI
- Movie API - Built the complete server-side to a movie app. Consisted of REST API and architected database built using JS, Node.js, Express, and MongoDB.
- Pokedex - Created a small web app with HTML, CSS, and JavaScript that loads data from an external API and enables the viewing of data point in detail
